

John Henry Foster

JHF Knows

Pneumatics and Hydraulics

Why choose John Henry Foster for your pneumatics and hydraulics needs? Since 1944, we have been solving problems better than anyone else in the industry; offering an easier way of doing business, more expertise and a personalized experience for every customer. As an employee-owned company, everyone at JHF is dedicated to helping you with your next project.

John Henry Foster knows fluid power. From in-stock components—manufactured by names you know and trust, to repair services and even custom-engineered systems—designed and built to your specifications, we have what you need, when you need it.

In-Stock Components

With over \$8 million of on-the-shelf stock and a convenient, on-site retail store, we have the reliable hydraulic and pneumatic products and assemblies your next project demands. From fittings, valves and gauges to cylinders, pumps and motors... and everything in between, John Henry Foster has you covered.

Custom-Engineered Systems & Solutions

At John Henry Foster, we can do it all. From value-added assemblies to complete, custom-engineered and integrated systems, we can help. With over a century of experience, our engineers will work with you and your sales advisor from start to finish — to achieve optimum form, fit and function for your application. Using one or many industrial technologies, we will recommend, design, fabricate and install systems that maximize productivity, efficiency and profitability.

Custom Assemblies

Tired of stocking components and wasting valuable resources assembling them for your operation? Let JHF help. Any size, any quantity, any complexity...we will stock the parts and our experts will assemble your components into one hassle-free, plug and play part number.

Hose Assemblies

Need a hose? Need it fast? You need John Henry Foster. We will fabricate custom hose assemblies and have them available immediately. Stocking a wide-variety of air, hydraulic and industrial hose as well as fittings, we have the hose assembly or components you need, when you need them.

Hydraulic Power Units

Don't try to fit a pre-built, catalog power unit in your unique application. Let John Henry Foster help! With a 3-D modeled, custom hydraulic power unit, you'll have exactly what you need for your application. Any size, any color, any quantity and even energy efficient designs to lower your cost of ownership, we can do it.
